Arjun

Question (a)

'Location Tracking'.

Answer:

1. Used by Google Maps and GPS to identify and track location of a place.
2. Geographic positioning, radio frequency identification sensors data about traffic conditions on particular route.
3. Can plan route according to travel time, transportation of the goods.
4. Companies reduce risks in transport improves speed, reliability in delivery.

Question (b)

Health Care Industry.

Answer:

Uses of Big Data:

Various apps, smartwatches, gadgets, etc. collect data about various functions of our body.

1. Data analyzed and feedback provided.
2. Doctors can have a better diagnosis of any ailment effects of any drug.
3. Past data of patients maintained suggestions, solutions for their problems given.
4. Helps in monitoring the outbreaks of epidemics, diseases.

Question (c)

Education Industry.

Answer:

1. Get information about the study patterns of students – can now prepare customized and dynamic learning programmes according to need of individual students.
2. Every student's comprehension level is different – course material designed to cater to different requirements of the students. One-size-fits-all pitfall avoided.
3. Students' choices, difficulties, results, etc. are available.
4. Strengths and weaknesses gauged -guidance while choosing career.

Question (ii)

When you are asked for personal details on social media, mention precautions that you will take.

Answer:

When I am asked for personal details on social media, I first try to find out who wants them and why. I never reveal credit/ debit card pin numbers, even if it is a bank asking me. I never give my mobile/adhaar card numbers either. I also keep my social media accounts private and visible only to friends. Only after checking and re-checking do I give any details, for I know that there are many cases of exploitation going on.

Question (iii)

Do you think all the data we receive is used for positive things? If 'No', make a list of the negative things which can be done with the help of Big Data.

Answer:

Negative things which can be done with the help of Big Data:

1. Loss of privacy-Big Data has all information about us.
2. Misuse of personal information
3. Leaking of information-this leads to thefts, blackmail, cheating, and so on.
4. Data may fall into wrong hands, and a person may be harassed.
5. Unsolicited calls and emails based on your internet history.

(A3)

Question 1.

Guess the meaning of the following idioms and phrases and use them in sentences of your own. One is done

AllGuideSite :

Digvijay

Arjun

for you.

One-size-fits-all – suitable for or used in all circumstances

The wrist watches have adjustable belts, so one – size – fits – all.

Question (a)

‘Once in a blue moon’:

Answer:

Meaning: very rarely.

Sentence: Our English teacher is very strict and smiles only once in a blue moon.

Question (b)

‘One man army’ :

Answer:

Meaning: A ‘one-man army’ is someone who can do, or thinks he can do, everything by himself and without assistance.

(A4)

Do as directed.

Question (a)

Advertisers are one of the biggest players in Big Data.

1. Begin the sentence with ‘Very few’

2. Use ‘bigger than’ and rewrite the sentence.

Answer:

1. Very few players in Big data are as big as advertisers.

(c) Climate Change (one of the biggest problems of today-must be taken very seriously-must change lifestyles-reduce consumption- recycle-carbon footprint)

(A6)

Question 1.

Find out job opportunities in the following areas and the skills required for them.

- (a) Clinical Data Management
- (b) Network Operations
- (c) Data Processing
- (d) Data Operations and Research
- (e) Data Entry Operation

Yuvakbharati English 12th Digest Chapter 1.4 Big Data-Big Insights Additional Important Questions and Answers

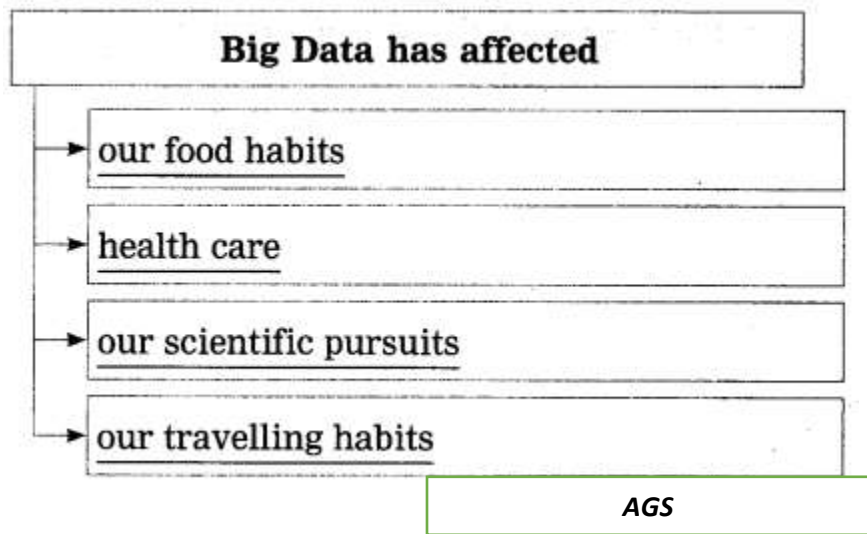

Global Understanding:

Question 1.

Complete the web:

(The answers are given directly and underlined.)

Answer:

Question 2.

Complete the following:

Answer:

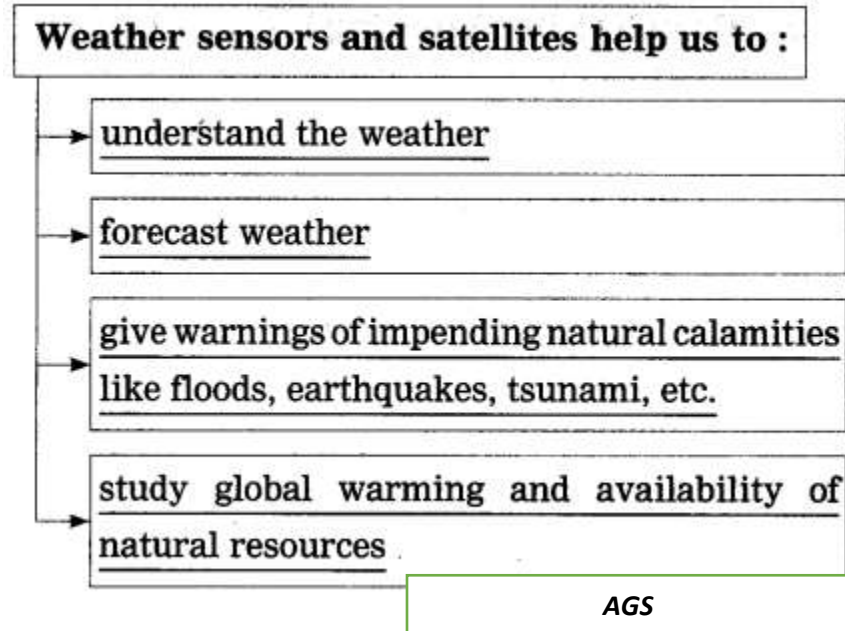

1. Big Data analytics is used to give insights that were previously incomprehensible.
2. Big Data is so massive that it challenges the current computing technologies.
3. It's not the amount of data that is important but what the [organizations do with the data is what matters.
4. Big Data analytics is the complex process of examining large and varied data sets or Big Data to uncover information.

Question 3.

Complete the web:

(The answers are given directly and underlined.)

Answer:

Question 4.

Complete the following:

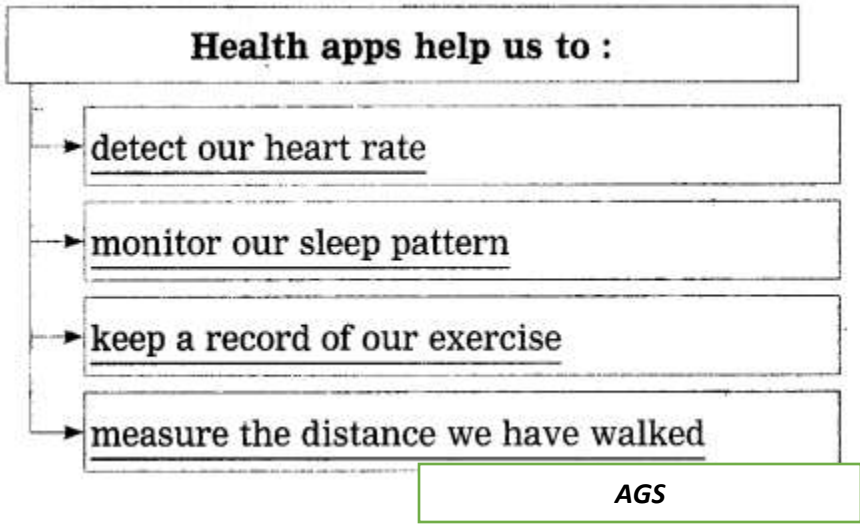

(The answers are given directly and underlined.)

AllGuideSite :

Digvijay

Arjun

Answer:

Question 5.

Write whether you agree or disagree with the following statements:

1. Today, the majority of equity trading takes place via data algorithms.
2. Big Data analytics cannot help in studying the investment patterns of people.
3. Big Data is useful in High-Frequency Trading.
4. Big Data cannot predict possible spikes on servers.

Answer:

1. Agree
2. Disagree
3. Agree
4. Disagree

Question 6.

Describe the ways used to create a huge database in sports.

Answer:

A huge data has been created over a period of time from the recording of matches, training sessions and workouts.

Question 7.

The database collected can help a sportsperson. Explain how.

Answer:

The data enables a sportsperson to study his own performance as well as that of the other players worldwide. It also helps in improving individual as well as team performance.

Question 8.

State the use of video analytics.

Answer:

Video analytics help one to see each and every performance minutely.

Question 9.

Name the Internet Giants mentioned in the extract.

Answer:

Facebook, Google, Twitter.

Question 10.

Pick out the False sentences, if any, and correct them:

1. Every student's level of understanding is the same.
2. Big Data has brought about a big negative change in the education industry.
3. Designing the course material to cater to different requirements of the students is a good idea.
4. Big Data has provided a solution to the 'one-size-fits-all' pitfall.

Answer:

False sentences:

AllGuideSite :

Digvijay

Arjun

- 1. Every student’s level of understanding is the same.
- 2. Big Data has brought about a big negative change in the education industry.

Corrected sentences:

- 1. Every student’s level of understanding is different.
- 2. Big data has brought about a big positive change in the education industry.

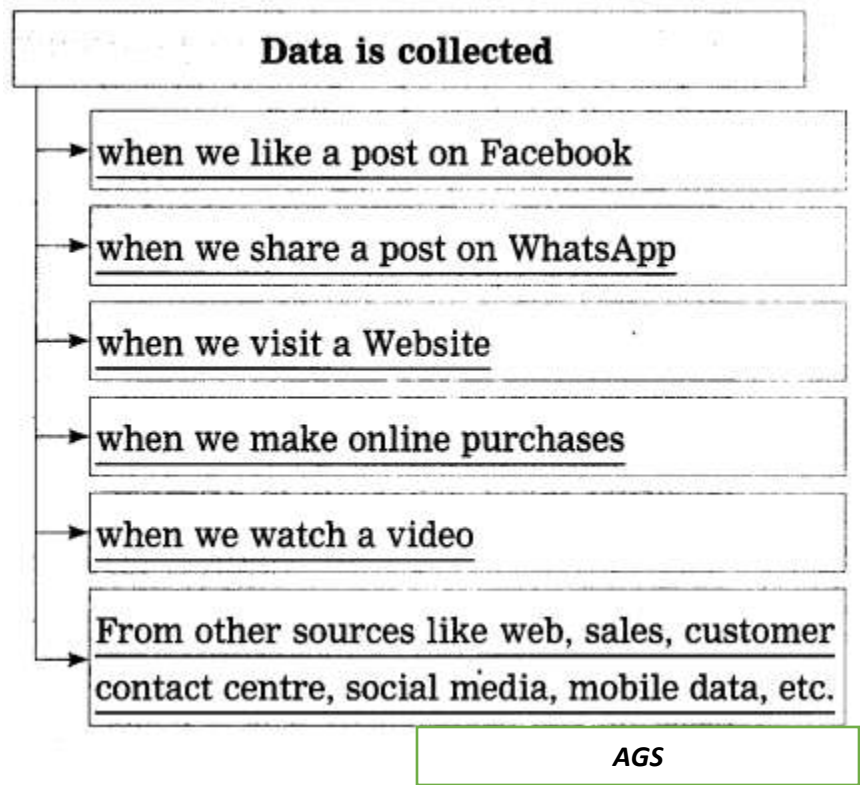

Complex Factual:

Question 1.

Complete the following describing the sources of the collection of data:

(The answers are given directly and underlined.)

Answer:

Question 2.

Mention the ways to reduce risk in transport.

Answer:

Big Data has been useful in identifying and tracking the exact location of a place. GPS and Google Maps make use of Big Data. With geographic positioning and radio frequency identification sensors we get the up-to-date data about traffic, congestion on a particular route, information if the route is closed or if it is a one-way route, understanding accident prone areas, etc. Thus, we can plan our own route according to the travel time and the transportation of goods.

If we have ordered something online we can track the location of our goods in transit, we can also track the condition of the goods. All this has immensely helped the logistics companies to reduce risks in transport, improve speed and reliability in delivery.

Question 3.

Complete the following:

(The answers are given directly and underlined.)

Answer:

- 1. Big Data helps to predict and prevent cybercrimes, card fraud detection, archival of audit trails, etc.
- 2. Banks can predict future attempts of frauds by analyzing the past data of their customers and the data on previous brute force attacks.
- 3. SEC is using Big Data to monitor financial markets for possible illegal trades and suspicious activities.
- 4. Big Data algorithms are used to make trading decisions.

Question 4.

List the ways in which sensors help a person.

AllGuideSite :

Digvijay

Arjun

Answer:

Sensors help a person:

1. to understand the game from close quarters
2. to understand field conditions
3. to understand the weather conditions
4. to understand individual performances

[Inference/Interpretation/ Analysis:](#)

Question 1.

Discuss and write how Big data is increasing in volume, variation, velocity, veracity and value.

Answer:

When we like a post on Facebook or share a post on WhatsApp, visit any website, make online purchases, or watch videos, the variety of activity we do online is recorded, monitored and analysed. So a huge amount of data is collected. Data is also collected swiftly from different sources, for example web, sales, customer contact centre, social media, mobile data and so on.

Big Data analytics is used to give insights that were previously incomprehensible. As more and more people use the Internet, social media, make online purchases, use mobile phones, and are generally more active online, Big data is increasing in volume, variation, velocity, veracity and value in leaps and bounds.

Question 2.

Do you think Big Data has improved the quality of life? Give reasons for your answer.

Answer:

Big Data has certainly improved the quality of life. Through various apps, we can maintain our body weight and exercise levels, and remain healthy. Our heart rate, sleep patterns, etc. can be monitored and any changes can be immediately reported to the doctor, who can then prescribe the correct treatment as soon as possible.

Age-related diseases like diabetes and arteriosclerosis can be treated at the early stages. Thus, we can lead healthier and more active lives. Big Data is also being used to. predict and monitor epidemics, thus ensuring that they affect as few people as possible.

Question 3.

Write some ways of the condition of the goods.

Answer:

When we order something online, we are given a tracking number. By logging into the website of the company and entering this tracking number in the given slot, we can find out the location and condition of the goods.

Question 4.

Can we understand the economy of the country by the data on Banking and Finance? Explain.

Answer:

Yes, we can. With the Big Data analytics the study of investment patterns of the people can be done. We can analyse the bank deposits made, the loans taken and the equity trading.

We can find out the business across borders. We can find out how many industries have come up, and what the industrial economy is. From all this information, we understand the economy of the country.

Question 5.

Explain, giving an example, the technique used by Netflix and YouTube to increase viewership.

Answer:

Netflix and YouTube know through Big Data just what a person has viewed and his/her behaviour online.

Based on this information, the person will be shown different recommendations. For example, if a person has

AllGuideSite :

Digvijay

Arjun

viewed a couple of horror films from start to end, Netflix will know that the viewer is interested in horror films.

Accordingly, Netflix will recommend a few more horror films. The viewer is pleased with this easy access to his/her favourite genre, and continues to be a customer, thus increasing Netflix revenue.

Question 6.

Discuss a solution provided by Big Data.

Answer:

Through Big Data we have information about the study patterns of students, and we can now prepare customized and dynamic learning programmes according to the need of an individual student.

[Personal Response:](#)

Question 1.

Industries can be benefited from data. Explain with an example.

Answer:

Industries can benefit from the huge amount of data available. For example, in the tourism industry, through Big Data travel agencies and hotels can identify the times when there are more crowds and hence more demand for a certain tourist spot.

They can accordingly make arrangements for more flights, trains, buses, tours, labour, essential items, etc. Hotels can use big data to compile and analyse information about their main competitors so that they are aware of what other hotels or businesses are offering customers.

Question 2.

Do you have any app on your phone that monitors your health? Describe it in brief.

Answer:

Yes, I have an app that helps me to measure the calories I have eaten and I can thus plan my meals. It also records my weight and tells me whether it has gone up or down. There is a very clear graph too which gives me complete information of the ups and downs in my weight. I have managed to lose a few kilos with the help of this app and feel much healthier now.

Question 3.

Do you use GPS and Google Maps? If so, where and when?

Answer:

I drive a two-wheeler. If I have to go to a new shop/hotel or some other place, I find out the route through GPS and follow this route. I used Google Maps when I went to Goa with my family and wanted to calculate distances and use the best routes.

Question 4.

Do you spend a lot of time on Facebook, Netflix, etc.? Do you think it is addictive?

Answer:

Yes, I do spend a lot of time on Facebook. I have a large number of friends, and hence the news feed is quite a lot. I like to know what my friends are doing, where they have gone, etc. It is addictive, and since I have Facebook on my mobile phone too, I can check it at any time. This is what most of my friends do too. I know it is not good, and I am trying to control screen time. I do not subscribe to Netflix.

Question 5.

Do you think Big Data will help to bring improvements in students? Give reasons for your answer.

Answer:

Yes, Big Data will certainly help to bring improvements in students. Students can learn topics/subjects according to their abilities and capacity. They can choose their careers after knowing their strengths and weaknesses, their mental make-up and abilities. Thus, there will be fewer drop-outs, and students will be happy in the careers they have chosen..
