Answer:
Sacrifice Ratio
C. State True or False with reasons:
Question 1.
A new partner can bring capital in cash or kind.
Answer:
This statement is True.
As per the provision of partnership deed, when any person is admitted in the firm, he has to bring some amount as capital which can be
in cash or in-kind of assets to get rights in the assets and definite share in the future profit of the firm.
Question 2.
When goodwill is paid privately to the partners, it is not recorded in the books.

Answer:

Allguidesite -- Arjun - Digvijay

This statement is True.

When goodwill is paid privately to the partners, by a newly admitted person, then in such case no transaction takes place in the business, and the firm as such is not all benefited. Hence it is not recorded in the books of accounts.

Question 3

The gain ratio is calculated at the time of admission of a partner.

Answer:

This statement is False.

At the time of admission of a person, in the business, sacrifices are made by the old partners in favour of the new partner. It means there is no question of any gain to the partners, so we can say that the Gain ratio is not calculated at the time of admission of a partner.

- Arjun
- Digvijay

Question 4.

Revaluation profit is distributed among all partners including new partners.

Answer:

This statement is False.

Revaluation profit arises due to efforts and hardworking of the old partners in the past and hence profit earned on revaluation of assets and liabilities at the time of admission of a person as a partner in the business belongs to old partners. So, such profit is not distributed among all partners including the new partners. It is distributed only among old partners.

Question 5.

Change in the relationship between the partners is called as Reconstitution of Partnership.

Answer

This statement is True.

When any person joins the business as a partner, a change in the relationship takes place. The old agreement is terminated and a new agreement is prepared. There is the change in profit or loss sharing ratio and relationship of the partners which is known as Reconstitution of Partnership.

Question 6.

New partners always bring their share of goodwill in cash.

Answer:

This statement is False.

When a new person is admitted to the partnership firm, the old partners surrender a certain share in profit and give it to a new partner. In exchange for that new partner is required to bring goodwill in cash or in kind. If he is unable to bring cash for goodwill, then Goodwill is raised and adjusted to the new partner's capital A/c.

Question 7.

When the goodwill is written off, the goodwill account is debited.

Answer:

This statement is False.

To write off goodwill means to decrease or wipe out the value of goodwill. When goodwill as an asset of the business is raised, Goodwill A/c is debited in the books of Account. Conversely, when Goodwill is written off from the business, the Goodwill A/c is credited in the books of business.

Question 8.

The new ratio minus the old ratio is equal to the sacrifice ratio.

Answer:

This statement is False.

When a new partner is admitted, old partners have to sacrifice their profit share in favour of the new partner and their old ratio gets reduced and whatever ratio is left becomes a new ratio. Hence, as per equation:

New Ratio = Old Ratio – Sacrifice Ratio.

By interchanging the terms,

Sacrifice Ratio = Old Ratio - New Ratio.

Question 9.

Usually, when a new partner is admitted to the firm, there will be an increase in the capital of the firm.

Answer:

This statement is True.

When a new partner is admitted to the firm, he brings his share of capital and goodwill, in cash or in-kind, to enjoy the right of sharing the future profit, and hence there will be an increase in the capital of the firm.

Question 10.

Cash/Bank Account is credited when goodwill is withdrawn by the old partners.

Answer:

This statement is True.

When a new partner brings his share of goodwill, old partners have the right to withdraw it in cash. Therefore, when old partners withdraw the amount of goodwill, cash goes out from the firm and not goodwill. Hence Cash/Bank A/c is credited.

D. Find the odd one.

Question 3.

Super profit method, Valuation method, Average profit method, Fluctuating capital method

Answer:

Fluctuating capital method

E. Calculate the following:

Question 1.

A and B are partners in a firm sharing profit and losses in the ratio of 1:1. C is admitted. A surrenders 1/4th share and B surrenders 1/5th of his share in favour of C. Calculate new profit sharing ratio.

Solution:

Old ratio of A and B = 1:1 or 12:12

A's sacrifice = $14 \times 12 = 18$

B's sacrifice = $15 \times 12 = 110$

Sacrificing ratio of A and B = 18:110 = 5:4

C's share = A's share + B's share = 18+110=5+440=940

A's new share = Old ratio - Sacrifice ratio = 12-18=4-18=38

B's new share = Old ratio - Sacrifice ratio = 12-110=5-110=410

Therefore, New ratio of A, B and C = 38:410:940 = 15:16:9

(Making denominator equal)

Question 2.

Anika and Radhika are partners sharing profit in the ratio of 5 : 1. They decide to admit Sanika to the firm for 1/5th share. Calculate the Sacrifice ratio of Anika and Radhika.

Solution:

Balance = 1 - share of new partner

= 1 - 15

= 45 (Remaining share)

New ratio = Old ratio x Balance of 1

Anika's New ratio = $56 \times 45 = 2030$

Radhika's New ratio = $16 \times 45 = 430$

Sanika's New ratio = $15 \times 66 = 630$ (Making denominator equal)

: New Profit and Loss ratio = 2030.430.630 = 20:4:6 i.e. 10:2:3

Sacrifice ratio = old ratio – New ratio

Anika's Sacrifice ratio = 56-2030=25-2030=530

Radhika's Sacrifice ratio = 16-430=5-430=130

 \therefore Sacrifice ratio = 530:130 = 5:1

Question 3.

Pramod and Vinod are partners sharing profits and losses in the ratio of 3 : 2. After the admission of Ramesh the New ratio of Pramod, Vinod and Ramesh are 4 : 3 : 2. Find out the Sacrifice ratio.

Solution:

Sacrifice Ratio = Old ratio - New ratio

Pramod's Sacrifice ratio = 35-49=27-2045=745

Vinod's Sacrifice ratio = 25-39=18-1545=345

 \therefore Sacrifice ratio = 745:345 = 7:3.

Working Notes:

- 1. Calculation of new profit ratio = 1 share of new partner
- = 1 14
- = 34 (Remaining share)

New ratio = old ratio × balance 1 (Remaining share)

Vikram's new ratio = $25 \times 34 = 620$

Pradnya's new ratio = $35 \times 34 = 920$

Avani's ratio = 14=14×55=520

 \therefore New profit sharing ratio = 6:9:5.

Capital amount adjusted in their new profit and loss ratio:

Total Capital of the Partnership Firm = (Reciprocal of New Partner's Share) × (Capital of New Partner)

- = (Reciprocal of 14) × 37,500
- $= 4 \times 37,500$
- = ₹ 1,50,000

Vikram's Capital balance = (Vikram's New Ratio) × (Total Capital of the firm)

= 620 × 1,50,000 = ₹ 45,000

Pradnya's Capital balance = 920 × 1,50,000 = ₹ 67,500

Working Notes:

- 1. Average Profit = TotalProfitNo.ofyears
- = 48,000+81,000+73,5003
- = ₹ 67,500
- ∴ Goodwill value = ₹ 67,500

Vasu's share in Goodwill = ₹ 40,500 (67,500 × 3*s*)

Viraj's share in Goodwill = ₹ 27,000 (67,500 × 2*s*)

2. Hari is not able to bring a share in goodwill and it is decided to raise the goodwill in the book. Therefore, Goodwill is recorded in the Asset side \neq 67,500.

Working Note:

Calculation of new ratio : Balance of 1 = 1 - share of new partner

= 1 - 15

= 45 (Remaining share)

New ratio = Old ratio × balance 1 (Remaining share)

Deep's new ratio = $34 \times 45 = 35$

Karan's new ratio = $14 \times 45 = 15$

- Arjun
- Digvijay

Shubham's new ratio = 15=15

 \therefore New profit and loss sharing ratio = 3 : 1 : 1

Capital amount to be adjusted in Partner's new profit and loss ratio:

Total Capital of the firm = (Reciprocal of New partner's share) × (New partner's capital)

 $= 5 \times 20,000$

= ₹ 1,00,000

Deep's capital balance = 35 × 1,00,000 = ₹ 60,000

Karan's capital balance = 15 × 1,00,000 = ₹ 20,000

2. Calculation of new profit sharing ratio: New Ratio = (Balance of 1) \times (old ratio)

- Arjun
- Digvijay

Kishor's New ratio = $(1-15)\times 34=45\times 34=35$

Lal's New ratio = $(1-15)\times14=45\times14=15$

Ram's ratio = 15

3. Total capital of the firm = (Reciprocal of Ram's ratio) \times (His capital contribution)

= *51* × 60,000 = ₹ 3,00,000

Kishor's new closing capital balance = 3,00,000 × 35 = ₹ 1,80,000

Lai's new closing capital balance = $3,00,000 \times 15 = ₹60,000$

Ram's new closing capital balance = ₹ 60,000

			Leena	58,050	1,11,900
		3,30,000			3,30,000

Working Notes:

- 1. R.D.D. to be increased by ₹ 5,000 means subtract ₹ 5,000 from Debtors.
- 2. Bills receivable taken by Vrushali at 10 % discount i.e. 12,000 1,200 = ₹ 10,800. Write this amount on the debit side of the partners' Capital Account in Vrushali's column.
- 3. Calculation of new ratio = 1 share of new partner
- = 1 14
- = 34 (Remaining share)

New ratio = Old ratio × Balance 1 (Remaining Share)

Vrushali's new ratio = 12×34=38

Leena's new ratio = 12×34=38

Aparna's ratio = 14

: Partner's new profit and loss ratio = 38:38:14 = 3:3:2

Now, capital amount to be adjusted in partners new profit and loss ratio.

Total capital of the firm = (Reciprocal of New Partner's Share) × (New Partner's Capital)

- = (Reciprocal of 14) \times 60,000
- $= 4 \times 60,000$
- = ₹ 2,40,000

Vrushali's capital balance = 38 × 2,40,000 = ₹ 90,000

Leela's capital balance = 38 × 2,40,000 = ₹ 90,000

The deficit of these capital balances is to be adjusted through the Current account.

To keep the balance of Vrushali's and Leena's capital ₹ 90,000 each, deficit of ₹ 53,850 and ₹ 58,050 are incurred which is transferred to the respective Partner's Current A/cs and recorded on the Asset side of Balance Sheet [As it is to be recovered from Partners].

Question 7.

Working Notes:

- 1. Cash balance = Opening balance + Amount brought in by Kamal
- = 1,10,000 + 50,000 + 40,000
- = ₹ 2,00,000
- 2. For calculation of new profit and loss ratio:

Calculation of new profit ratio = 1 - share of new partner

- = 1 14
- = 34 (Remaining share)

New ratio = old ratio \times balance 1 (Remaining share)

Amit's new ratio = 25×34=620

Baban's new ratio = $35 \times 34 = 920$

Kamal's ratio = $14=14\times55=520$

3. New profit and loss ratio = 6:9:5

Capital amount adjusted in their new profit and loss ratio by taking new partner Kamal's capital (₹ 50,000) as a base.

For part 5 capital = ₹ 50,000 (Kamal's capital)

For part 6 capital = ₹ 60,000 (Amit's capital)

For part 9 capital = ₹ 90,000 (Baban's capital)

4. After keeping these capital balances difference of the amount of Amit's capital ₹ 63,520 and of Baban's capital ₹ 45,280 are taken as partner's loan to the firm and as a liability of the firm it is recorded in the Liabilities side of the Balance Sheet.
